FESTIVAL GUIDE

The tribe is our oldest way of being. It is the root that we have failed to see for so long from our lofty perch atop the tree's branches. It is a culture that we had nearly forgotten about. That is, until the fires of transformative festivals began to spread. Festivals such as Burning Man and its global decompression events, Lightning in a Bottle, Treasure Island Music Festival, The Love Festival and many, many more. A new global culture has arisen, the likes of which have never been seen before. A culture focused more on the idea of human interaction and gifting rather than consumerism and greed. A culture where love and ideas are spread freely and generously. What's more is that it continues to gain momentum at a rate so massive that the venues that hold these festivals are bursting beyond capacity threatening to throw the world into a pandemic of peace, love and anarchy.

Before you stands an era unlike any other, a world full of impossibilities turned possible by the voice of a united consciousness. This united consciousness is not the work of a singular person or a global corporation, but rather the next evolutionary step of the giants that stood before us. Avarice and the need to conquer have driven many of the technological wonders of the last two centuries, each wonder building upon the last exponentially in time and advancement. This technological explosion left our humanity at the starting line and it has only been in the last two decades that we have seen it close the gap. The technological advancements that have been pushing us away from each other have finally brought us back closer than ever. The internet has brought the human element back from the brink of obscurity. It has brought us into the folds of a global tribe.

And this is where you come in. The evolution behind these festivals isn't the will of a single person or the quarterly profits of a mega-conglomerate. The evolution is the constant co-creation of festival goers like you. The dreams and ideas you share spread by touch, by voice and by dance. The pure unbridled optimism and joy that you can bring to the desert floor, forest meadows, mountain valleys and lake shores can start a confluence of events that can change the world in a tsunami of technological and societal innovations. Beyond these pages is a world on the brink of true human evolution in the form of some of the most transformative and inspiring festivals the world has ever seen. Festivals that will help change the world, but only if you are there.

Peace and Love,
The Roachclip Team

P.S. If you represent any of the festivals in this guide, would like to add your festival or would like to contribute in any way you can reach us at support@roachclip.com. Cheers!

It's like going to another country, a hip and thrilling Brigadoon that appears every year or so. Coming to Glastonbury involves a fair amount of travel, and probably a queue to get in but, when you get past these impediments, you enter a huge tented city, a mini-state under canvas. British law still applies, but the rules of society are a bit different, a little bit freer. Everyone is here to have a wild time in their own way.

Festival: Lightning in a Bottle
Type: Music, Art, Performance, workshops, speakers

Location: Orange, CA
Latest Venue: Oak Canyon Ranch
Time of Year: Late May

The history of LIB spans more than a decade, and friends, family, and cohorts of the Do LaB are thrilled and astounded that it' s been more than ten years of making miracles and catching Lightning in a Bottle!

The tale begins at the dawn of the 21st century in the underground music community of Los Angeles. Underwhelmed by the mainstream nightclub scene of Hollywood and eager to create a memorable experience with more heart and more teeth, a small group of friends turned to the natural beauty of Southern California's mountains and forests. Equipped with generators, X-mas lights, old-skool vinyl, and a healthy measure of can-do attitude and leave-no-trace ethos, the crew behind the first LIB in the summer of 2000 numbered barely 100 people total. And yet, at that first event, a spark was kindled and there was no doubt that lightning would strike again!

Festival: Lollapalooza
Type: Music, Concerts

Location: Chicago, Illinois
Latest Venue: Grant Park
Time of Year: Early August

From the early days when flannel-clad grunge rockers cleared out mosh pits for bands like Soundgarden and Pearl Jam to the present, when Arcade Fire and Kanye West draw gigantic crowds of all ages, the festival has taken on a life of its own, infused with the incredible energy of fans and the artists that rock them.

Sure, a lot has changed: fans' tastes in music, exciting new artists, evolving genres, fresh fashions and that whole "Internet" thing. But two decades on the cutting edge also means there are some great stories to tell. Lolla was in the delivery room when alternative rock was born, brought hip-hop to the masses, waved glow sticks when the electronica scene came of age, and staked out tiny clubs to bring the best indie-rock to the big stage. Through ups, downs (and upside downs), music history has been made and re-made with each passing year.
