PhotoAlbum Integration Install

In order to install the "**phpFox PhotoAlbum Integration**", please follow the steps below:

- Open the file: "config.inc.php" contained in the folder: "include"
  (in this mod not your phpFox)

  - If you are using Short URL's, please replace 0 with 1 for the variable "$shortURL"
  - If you are using phpFox in a Subdirectory on your Webserver, please put this (with a trailing slash) in for the variable "$subDir". (Example: $subDir='development/' with the trailing slash)

The integration Script takes the following parameters:

1. **mode →**
   album (for photos in a specific Album)

2. **limit →**
   number of items shown on the left hand side (thumbnails)

- **Upload the whole folder "galleriffic" to the root directory of your phpFox Installation**

- **Open your Admin Control Panel and go to:**
  → CMS
  → Blocks
  → Add New Block

After you have copied each of the following code blocks, please replace: "YourDomain.com" with your actual domain.

Photo Album Block

- **"Block Details"**
  Select the following options:

  Product → phpFox
  Module → Photo
  Title → Whatever you want
  Type → PHPCode
  Controller → --photo.album
  Placement → Block2
  Active → Yes

- **“PHP/HTML Code (Optional)”**
  “Copy and Paste” the following **code into the TextArea:**

  Code:

```
<?
function curPageURL() {
 $pageURL = 'http';
 if ($_SERVER["HTTPS"] == "on") {$pageURL .= "s";}
 $pageURL .= "://";
 if ($_SERVER["SERVER_PORT"] != "80") {
  $pageURL .=
$_SERVER["SERVER_NAME"].":".$_SERVER["SERVER_PORT"].$_SERVER["REQUEST_URI"];
 } else {
  $pageURL .= $_SERVER["SERVER_NAME"].$_SERVER["REQUEST_URI"];
 }
 return $pageURL;
}

$url = curPageURL();
$find = 'http://www.';

$pos = strpos($url, $find);

if($pos === false)
{
$www = 0;
}
else
{
$www = 1;
}

$urlChunks = explode("/", $_GET['do']);

?>

<iframe frameborder="0" scrolling="no" src
="http://YourDomain.com/galleriffic/index.php?mode=album&limit=16&userName=<?ph
p echo $urlChunks[1]; ?>&albumName=<?php echo $urlChunks[3]; ?>&www=<?php echo
$www; ?>" width="100%" height="400">
<p>Your browser does not support iframes.</p>
</iframe>
```

- **<u>User Group Access</u>**
  Choose which **User Groups** you want to allow **access** to this Block

- **Click** the **"Submit"** Button

<u>A new Block containing the "PhotoAlbum" has been created on:</u>
Explore → Photos → Photo Albums → Click on an Album

Recent Photos Block

- **"Block Details"**
  Select the following options:

  Product → **phpFox**
  Module → **Photo**
  Title → **Whatever you want**
  Type → **PHPCode**
  Controller → **--photo.index**
  Placement → **Block2**
  Active → **Yes**

- **“PHP/HTML Code (Optional)”**
  “Copy and Paste” the following **code into the TextArea:**

  Code:

```
<?
function curPageURL() {
 $pageURL = 'http';
 if ($_SERVER["HTTPS"] == "on") {$pageURL .= "s";}
 $pageURL .= "://";
 if ($_SERVER["SERVER_PORT"] != "80") {
  $pageURL .=
$_SERVER["SERVER_NAME"].":".$_SERVER["SERVER_PORT"].$_SERVER["REQUEST_URI"];
 } else {
  $pageURL .= $_SERVER["SERVER_NAME"].$_SERVER["REQUEST_URI"];
 }
 return $pageURL;
}

$url = curPageURL();
$find = 'http://www.';

$pos = strpos($url, $find);

if($pos === false)
{
$www = 0;
}
else
{
$www = 1;
}

$userID = Phpfox::getUserId();

$urlChunks = explode("/", $_GET['do']);

?>

<iframe frameborder="0" scrolling="no" src
="http://YourDomain.com/galleriffic/index.php?mode=photo&modeState=<? echo
$urlChunks['2']; ?>&limit=16&userID=<? echo $userID; ?>&www=<?php echo $www; ?>"
width="100%" height="400">
<p>Your browser does not support iframes.</p>
</iframe>
```

- **User Group Access**
  Choose which **User Groups** you want to allow **access** to this Block

- **Click** the **"Submit"** Button

A new Block containing the "Recent Photos Integration" has been created on:
Explore → Photos

You're done ☺
