About “Extras”

The folder “extras” for this mod contains a modified “module\photo\template\default\block\photo-entry.html.php”

This file has been modified so that the standard phpFox view for photos is only visible for the main administrator “user_id → 1”

All other users/members will only see the Gallery integration.

In order to install this “extra”, please upload the file: “photo-entry.html.php” to “\module\photo\template\default\block\” and overwrite the existing one.

Please make sure you back up the original “photo-entry.html.php” so you can revert in case you want/need to.

This extra is not necessary to use this mod and it is possible that this file has already been edited by a different modification on your site.

Please make sure you know what you are doing before overwriting this file.

In case you need help, please feel free to contact me at:
