WebUploader Install

In order to install the WebUploader, please follow the steps below:

- Upload the whole folder **"WebUploader"** to the **root directory of your phpFox Installation**

- **Open a browser and navigate to:**
  http://yourdomain.com/WebUploader/install/install.php
  (The installer will attempt to create a new table in your database, which is needed for the Uploader to work)

- **Open your Admin Control Panel and go to:**
  → **CMS**
  → **Blocks**
  → **Add New Block**

- **"Block Details"**
  Select the following options:

  Product → **phpFox**
  Module → **Photo**
  Title → **Whatever you want**
  Type → **PHP Code**
  Controller → **--photo.upload**
  Placement → **Block4** (You can basically choose whatever placement suits you)
  Active → **Yes**

- **“PHP/HTML Code (Optional)”**
  “Copy and Paste” the following **code into the TextArea:**

  Code:

  ```
  <?
  $user_id = Phpfox::getUserId();

  include('./include/setting/server.sett.php');
  include('./WebUploader/include/db.inc.php');
  include('./WebUploader/include/config.inc.php');
  include('./WebUploader/include/generateToken.php');
  include('./WebUploader/include/tokenManager.php');
  ?>

  <iframe src ="http://YourDomain.com/WebUploader/WebUploader.php?userId=<?
  echo $user_id; ?>&token=<? echo $token; ?>&MaxFileSizeKB=<? echo $MaxFileSizeKB;
  ?>&MaxUploadSpaceKB=<? echo $MaxUploadSpaceKB; ?>&UserSpaceUsedKB=<?
  echo $UserSpaceUsedKB; ?>" frameborder="0" scrolling="no" width="100%"
  height="550">
    <p>Your browser does not support iframes.</p>
  </iframe>
  ```

- **User Group Access**
  Choose which **User Groups** you want to allow **access** to the “**WebUploader**”

- **Click** the **“Submit”** Button

  As the last step is VERY important, we have increased the letter size ☺

- **Please go to: Settings → System Settings → Manage Settings → Photo**
  Please click the “Submit” Button

A new Block containing the “WebUploader” has been created on:
Explore → Photos → Upload a new Image

You're done ☺
